

“Fridays of Storage” Session

What’s new on the Storage Networking Market

Telematics and Services organizes Technical Information Sessions, the “Fridays of Storage”, in its training centre in Brussels. The sessions will update you on the latest products and solutions in the world of Storage and Storage Networking and will be followed by a walking lunch in order to give you the opportunity to discuss with our experts.

How to improve drastically the Data Access for your Virtual Servers ?

7th of May from 9.00 to 12.30 - Brussels

The topics

BROCADE technology

- ☞ **Adaptative Networking**
 - With a Data Center Fabric strategy
 - Using “converged multiprotocol fabrics”
- ☞ **Data Center Fabric technologies**
 - Fibre Channel over Ethernet
 - Converged Enhanced Ethernet
 - Encryption services
 - Policy-controlled (QoS) data mobility
 - New Host Bus Adapter technology

HITACHI Data Systems technology

- ☞ **Virtualized Storage Solutions for your Virtual Servers**
- ☞ **Combined Technologies geared towards VMware DR**
 - Storage embarked copy software
 - VMware Site Recovery Manager (SRM)
 - SAN-over-WAN networking
